

Sustainable food delivery systems

Collaborative working

Louise Bloom

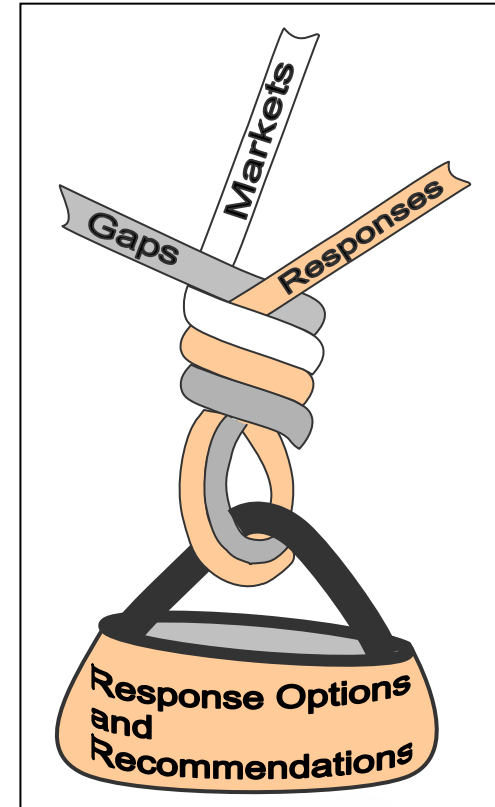

22nd March 2012

OXFAM

Emergency Food Security & Livelihoods Programming

- **Cash transfer** programmes v's direct food distribution?
- **Market Mapping** analysis - how has the crisis has effected staple market systems?
- Using the analysis to choose the **best modality** of response

Supply & Logistics

Standardisation; Partnerships; Humanitarian; Cost Effectiveness; Staff Development; Visibility & Information; Leveraging our expenditure.

- **Project centrality and building up**
 - Integral to front end of projects
 - Build on local competence and markets
 - Flexibly adapt supply chain & performance to various modes of operation
 - Emphasise use of local markets and resources

Collaboration

- **Using existing market knowledge**
- **Market analysis & price monitoring**
- **Trader selection**
- **One market approach in country**
- **Supply planning and tracking**

**How can we enhance this
collaboration for more
sustainable systems?**
